WEB DEVELOPMENT PROJECT REPORT

Personal Portfolio Website

Student: Sayyad Sajida Syed

Roll No: 26000127

Branch / Section: CSE, Sec-2

University: Dr. RVR & NRIIT Deemed University

Subject: HTML Web Development

GitHub: github.com/Sajida-16/HTML_WEBDEV_Sajida

Submitted: October 2026

This report organizes the four supplied screenshots and explains the portfolio website’s layout, content, technologies, and purpose.

1. Introduction

A personal portfolio website is an online profile that introduces a student and presents their skills, projects, interests, and contact information. It can help the student share their work with teachers, collaborators, and potential internship or placement reviewers.

2. Objectives

• Introduce the student and their academic background.
• Present technical skills in a clear, visual format.
• Display sample projects and interests.
• Provide contact information for visitors.
• Practise core front-end web development skills.

3. Technologies Used

HTML5: Structures the content using headings, paragraphs, navigation, sections, and a footer.
CSS3: Adds colors, typography, spacing, backgrounds, and card styles.
Flexbox: Helps align and arrange elements in rows or columns and can support responsive layouts.

4. Explanation of Website Sections

Header: Shows the student's name and course details with an orange background.
Navigation bar: Contains About, Skills, Projects, and Contact links on a dark background.
About Me: Introduces the student's interests in programming, web development, and Artificial Intelligence.
My Skills: Displays HTML, CSS, Python, and C Programming in separate cards.
My Projects: Shows a Personal Portfolio and College Website. The accompanying description also mentions Digital Library Management.
Hobbies: Lists reading, learning new technologies, and speaking.
Contact: Displays the email shown in the supplied screenshot.
Footer: Shows the copyright year and portfolio title.

5. Screenshot 1 — Header, About, and Skills

The first screenshot shows the orange header with the student's name, the dark navigation bar, an About Me introduction, and four skill cards. The use of contrast and separate cards makes the main information easy to scan.

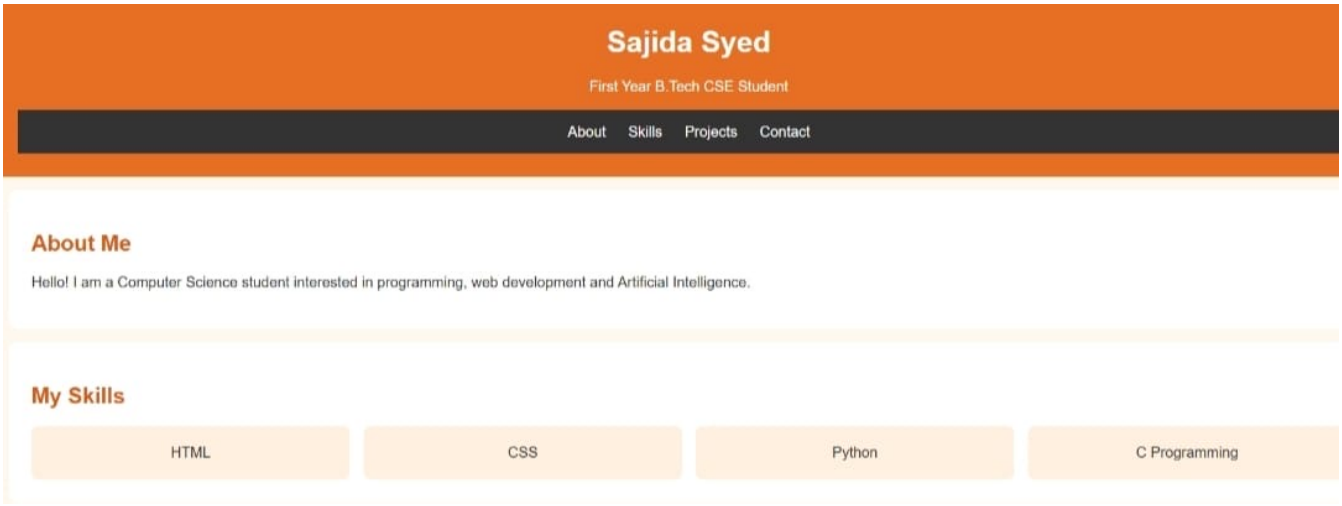

Figure 1: Supplied screenshot of the portfolio project.

6. Screenshot 2 — Projects, Hobbies, and Contact

This screenshot presents project cards for the Personal Portfolio and College Website, followed by hobbies and contact details. The footer visually marks the end of the page.

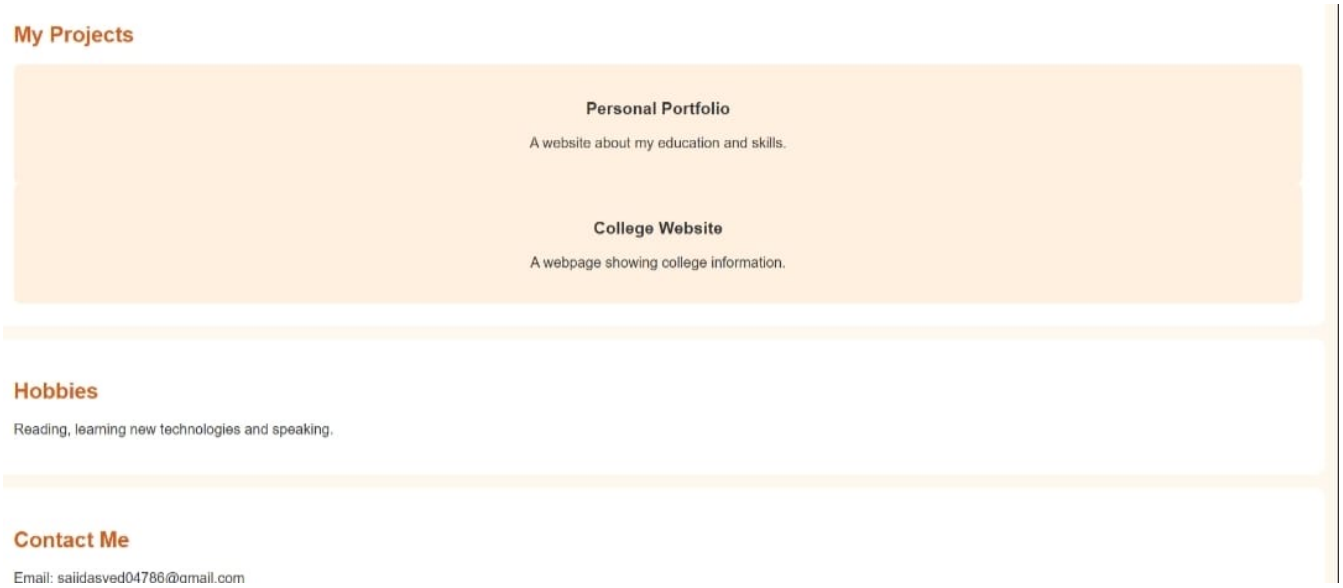

Figure 2: Supplied screenshot of the portfolio project.

7. Screenshot 3 — Project Description

This screenshot documents the purpose and observed features of the portfolio. It summarizes the page sections and identifies HTML5, CSS3, and Flexbox as the technologies used.

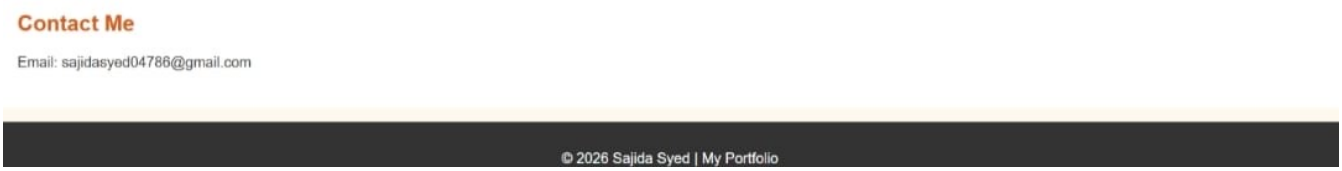

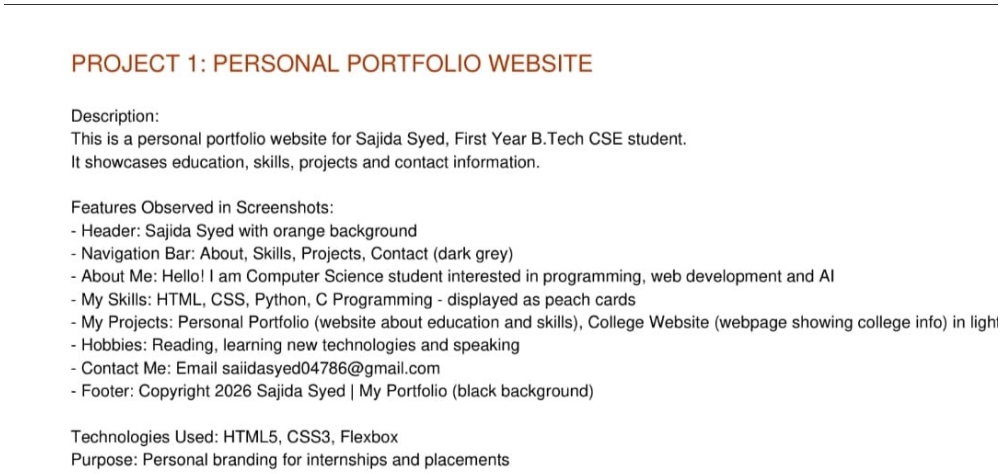

Figure 3: Supplied screenshot of the portfolio project.

8. Screenshot 4 — Contact and Footer

The final screenshot focuses on the Contact Me section and the dark footer. Keeping contact details near the bottom gives visitors a clear place to find the email information.

PROJECT 1: PERSONAL PORTFOLIO WEBSITE

Description:
This is a personal portfolio website for Sajida Syed, First Year B.Tech CSE student.
It showcases education, skills, projects and contact information.

Features Observed in Screenshots:
- Header: Sajida Syed with orange background
- Navigation Bar: About, Skills, Projects, Contact (dark grey)
- About Me: Hello! I am Computer Science student interested in programming, web development and AI
- My Skills: HTML, CSS, Python, C Programming - displayed as peach cards
- My Projects: Personal Portfolio (website about education and skills), College Website (webpage showing college info) in light
- Hobbies: Reading, learning new technologies and speaking
- Contact Me: Email saiidasyed04786@gmail.com
- Footer: Copyright 2026 Sajida Syed | My Portfolio (black background)

Technologies Used: HTML5, CSS3, Flexbox
Purpose: Personal branding for internships and placements

Figure 4: Supplied screenshot of the portfolio project.

9. Conclusion

The Personal Portfolio Website is a useful introductory web development project. It combines structured HTML content with CSS styling and a simple navigation system to present a student's profile, skills, projects, hobbies, and contact information in one place.

10. Suggested Improvements

- Make sure the layout adapts well to phones, tablets, and desktop screens.
- Link navigation items to the matching sections using unique HTML IDs.
- Add live links or short descriptions for each project.
- Use accessible labels, keyboard focus styles, and sufficient color contrast.
- Consider adding a résumé link and GitHub project links.
- Share personal contact details publicly only when appropriate.

Overall, the project demonstrates foundational skills in HTML5, CSS3, and page layout while providing a starting point for a student's professional online presence.

Project Documentation

DR.RVR NRIIT Deemed to be University Website Frontend Implementation

Project Overview

Project Name: DR.RVR NRIIT DEEMED TO BE UNIVERSITY WEBSITE

Tagline: *Learn Today, Lead Tomorrow*

Purpose: To provide comprehensive university information, display department offerings, showcase campus facilities, and collect prospective student admission enquiries.

Technologies Used: HTML5 CSS3 Forms

Figure 1: Project Overview & Requirement Specifications

Detailed UI Component Breakdown

1. Header, Navigation & Hero Section

The top layout consists of a primary header branded with university credentials, followed by a dark navigation bar providing quick links (Home, About, Departments, Facilities, Admissions). Below the navigation, a prominent hero section invites users with a core welcome message and a primary call-to-action button (*Apply Now*).

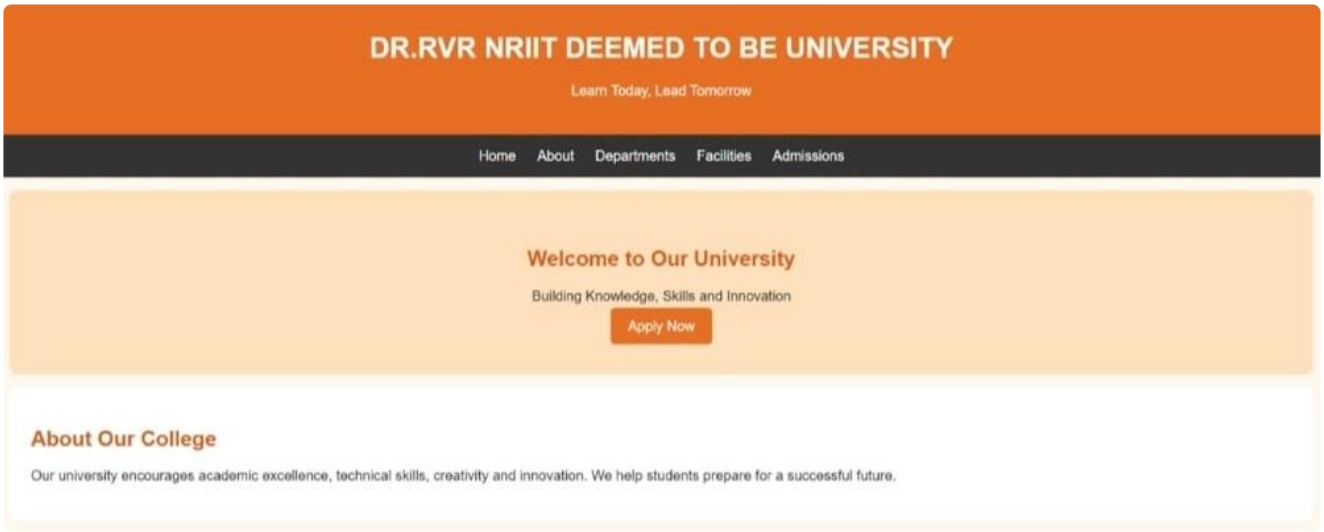

Figure 2: Top Header Banner, Navigation Bar, Hero Banner, and About Us Section

2. Academic Departments & Campus Facilities

This section displays the diverse range of academic specializations offered across Computer Science, Engineering, and allied branches. Below the department matrix, interactive card elements display key campus amenities including the Library, Computer Labs, Sports Complex, and Transport Facilities.

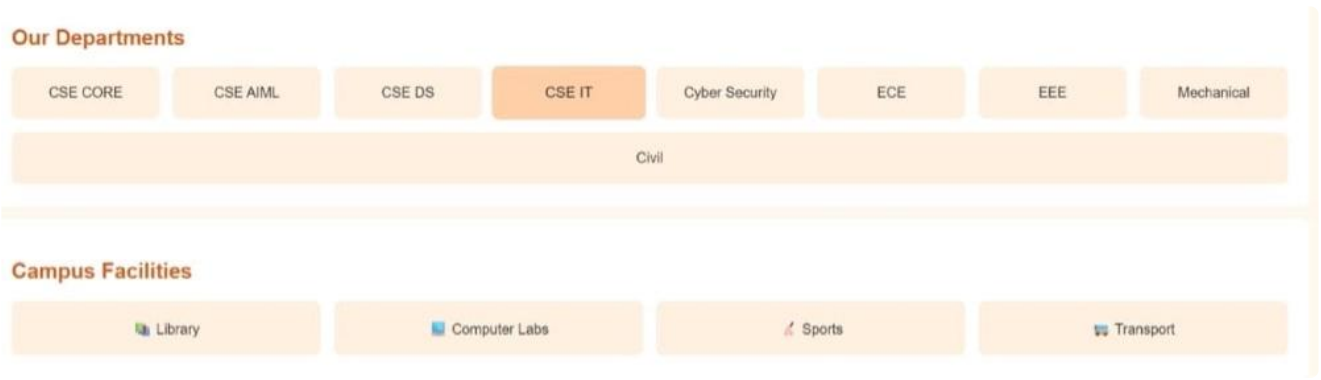

Figure 3: Academic Departments Display and Campus Facilities Section

3. Admissions Enquiry Form & Footer

The admissions portal allows prospective students to submit initial enquiry details (Name, Email, Department of interest). The layout concludes with a clean, centered copyright footer.

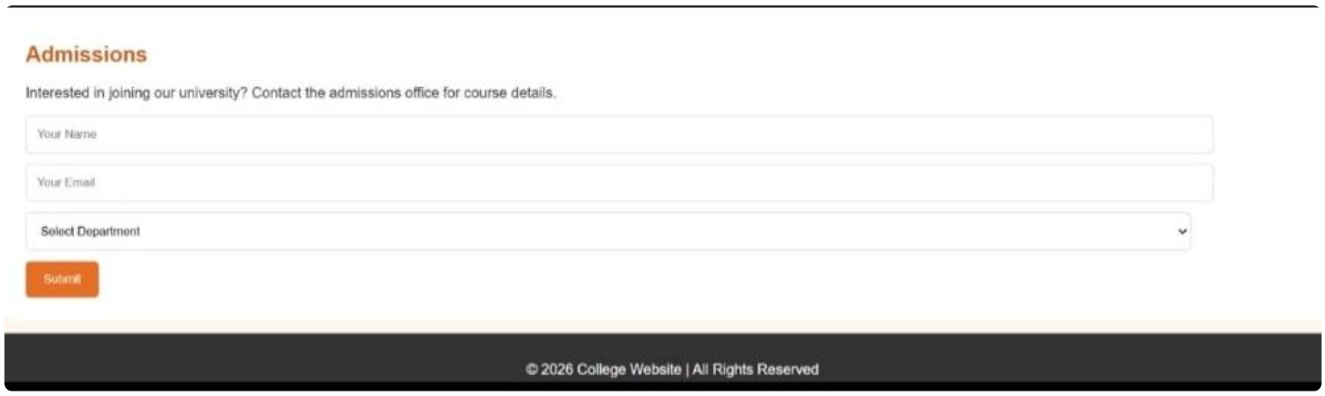

Figure 4: Admissions Contact Form and Global Footer

Key Features Observed

- **Branding Header:** Vibrant orange top banner featuring university name and tagline ("Learn Today, Lead Tomorrow").
- **Navigation:** Dark horizontal navigation bar for intuitive single-page section scrolling.
- **Hero Banner & Call-to-Action:** Warm background hero container featuring key introduction text and an orange "Apply Now" CTA button.
- **Department Grid:** Distinct department badges (CSE CORE, CSE AIML, CSE DS, CSE IT, Cyber Security, ECE, EEE, Mechanical, Civil) with visual highlighting on active selections (CSE IT).
- **Facilities Section:** Icon-assisted callouts highlighting core campus infrastructure (Library, Computer Labs, Sports, Transport).
- **Admissions Form:** Functional HTML form fields (Name, Email, Department dropdown, Submit button) for streamlined user lead generation.

Project Documentation & Overview

B.Tech CSE First Year Front-End Development Projects

Submitted By: Sayyad Sajida Syed (26000127 - CSE Sec-2)
Institution: DR. RVR NRIIT Deemed University
Primary Project: Digital Library Management System

1. Project 3 Overview: Digital Library Management System

Detailed Analysis:

This image provides a comprehensive project summary for *Project 3: Digital Library Management System*.

- **Description:** A digital library interface designed with a distinct purple theme for searching and managing books.
- **Features Observed:** Includes a header banner, multi-tab navigation, welcome search area, book categories, popular books display cards, library rules list, and structured book information table.
- **Technologies Used:** Built using HTML5, CSS3, dynamic table structures, CSS card components, and search UI layout elements.
- **Purpose:** Serves to simulate an intuitive online library catalogue and real-time book availability tracking system.

2. Interface Layout: Header & Navigation Banner

Detailed Analysis:

This snippet showcases the top branding section and primary navigation interface of the web application.

- **Header Banner:** Features a prominent dark purple branding block displaying the title "Digital Library" alongside a colorful stacked book icon and tag line *"Discover Your Next Favorite Book"*.
- **Navigation Bar:** A sleek horizontal navigation menu linking to core sections: *Home*, *Books*, *Categories*, and *Library Rules*.

- **Hero Section & Search:** A soft lavender card welcoming users (*"Welcome to Our Library - Read, Learn and Explore New Ideas!"*) complete with an interactive search bar standard for filtering catalog items.

3. Content Modules: Book Categories & Popular Books

Detailed Analysis:

This visual section demonstrates the visual card-based layout components implemented for organizing books.

- **Book Categories:** Displays responsive light-purple category pills containing icons for quick filtering: *Programming*, *Science*, *Fiction*, and *History*.
- **Popular Books Section:** A card grid featuring top books with cover thumbnails, titles, author details, and availability badges:
  - AVAILABLE *The C Programming Language* by Brian Kernighan (Category: Programming)
  - AVAILABLE *Clean Code* by Robert C. Martin (Category: Programming)
  - UNAVAILABLE *Pride and Prejudice* by Jane Austen (Category: Fiction)

4. Information Architecture: Rules & Data Table

Detailed Analysis:

This section displays structured information presentation through clean bullet points and tabular formatting.

- **Library Rules Section:** Bulleted guidelines emphasizing operational conduct: return books on time, maintain cleanliness, keep silence, and handle materials with care.
- **Book Information Table:** A clean HTML table featuring a bold purple header row structured with columns: *S.No*, *Book Name*, *Author*, and *Status*.
- **Footer:** Standard copyright footer (*© 2026 Digital Library Management*) maintaining overall UI consistency.

5. Summary: Conclusion & Learning Outcomes

Detailed Analysis:

The final image details the academic learning outcomes and core technical takeaways gained through building these web applications.

- **HTML Structure Mastery:** Hands-on implementation of structural elements including header, nav, section, footer, forms, tables, and lists.
- **CSS Styling & Color Theory:** Skillful application of primary brand colors (#FF6A00 orange and #4C1D95 purple), flexbox layouts, card designs, and responsive viewport sizing.
- **UI/UX Best Practices:** Focus on consistent visual branding, hover state animations, user-centric navigation, and clean page flow.
- **Deployment:** Knowledge of GitHub hosting to publish HTML/CSS files live.
